~10% qoq growth in ARPU drove 4Q25 EPS beat; FY26 guidance likely conservative - reiterate OW

Overweight

ISAT.JK, ISAT IJ
Price (09 Feb 26):Rp2,110
▲**Price Target (Dec-26):Rp3,300**
Prior (Dec-26):Rp2,900

ISAT reported a ~10% qoq growth in wireless ARPU to Rp44k. The growth in ARPU was the main driver of the earnings beat - ISAT's 4Q25 EBITDA grew 14% yoy and 12% qoq to Rp7.2tn - 5%/4% better than JPMe/consensus. In our view, the growth in ARPU at the expense of customers has a positive read-through for the industry as it indicates a more rational competitive environment and a move away from competition based on customer market share. We see upside risks to FY26 guidance that revenue and EBITDA will grow by a mid-to-high-single-digit rate. We reiterate our OW rating on ISAT and raise our Dec-26 PT to Rp3,300.

- **Wireless ARPU drove 4Q25 earnings beat.** ISAT reported ~10% qoq growth in wireless ARPU to Rp44k. This was due partly to a ~800k reduction in wireless customers in the quarter but mainly to better monetization of traffic. In our view, this has a positive read-through for the industry as it signifies a more rational competitive environment and the industry transitioning from customer market share competition. Mainly as a result of strong growth in wireless revenues, 4Q25 group revenues grew by 9% yoy and 9% qoq to Rp15.4tn - 5% better than JPMe and Bloomberg consensus. EBITDA of Rp7.2tn was up 14% yoy and 12% qoq - 5%/4% better than JPMe/consensus. Normalized NI of Rp1.99tn was >50% ahead of JPMe and consensus. While the results could partly have been supported by one-offs reducing reported costs, the main driver of the earnings beat was higher-than-expected growth in revenues.
- **Upside risks to guidance and consensus expectations.** ISAT is guiding to mid-to-high-single-digit growth in revenues and EBITDA in 2026. In our view, the guidance is conservative. We see upside risks to guidance in a rational competitive environment characterized by better monetization of traffic. We forecast ~10% growth in revenues and EBITDA in FY26. Our FY26E EBITDA is 4% ahead of Bloomberg consensus.
- **Healthy B/S supports capital management and growth initiatives.** We calculate ISAT's 2026E Net Debt /EBITDA at 1.4x (including lease liabilities). In our view, the healthy B/S supports growth investments in broadband, 5G, and AI. In our view, ISAT also has room to increase its dividend payout. We forecast a 70% dividend payout ratio for 2026.
- **Raise PT to Rs3,300.** We raise our FY26/27 EPS forecasts by 17%/15%, mainly due to lower D&A and interest expenses. As a result of these changes and value-unlocking at the fiber assets, our Dec-26 PT increases to Rp3,300. In Dec-25, ISAT signed an agreement that will see the creation of a FiberCo, and ISAT plans to spin off fiber assets spanning 86,000 km, including backbone, domestic subsea, and access infrastructure. ISAT disclosed the fiber asset valuation at Rp14.6tn and said it would retain a 45% stake in the FiberCo.

Summary Investment Thesis and Valuation

Investment Thesis

We anticipate a strong earnings growth outlook for ISAT, driven mainly by the mobile segment. We believe the healthy growth in mobile revenues will translate into strong growth in earnings due to ISAT's high operating leverage. We believe ARPU reflation should drive expansion in ROIC, which has generally been correlated with valuation multiples. New growth initiatives offer option value. We rate ISAT OW.

Valuation

We derive our Dec-26 PT based on a 2027E P/E of 13x. This is at a premium to our target multiple for TLKM in view of the higher growth profile of ISAT. Improving ROICs should drive valuation multiple expansion, in our view.

Investment Thesis, Valuation and Risks

Indosat Tbk PT *(Overweight; Price Target: Rp3,300)*

Investment Thesis

We anticipate a strong earnings growth outlook for ISAT, driven mainly by the mobile segment. We believe the healthy growth in mobile revenues will translate into strong growth in earnings due to ISAT's high operating leverage. We believe ARPU reflation should drive expansion in ROIC, which has generally been correlated with valuation multiples. New growth initiatives offer option value. We rate ISAT OW.

Valuation

We derive our Dec-26 PT based on a 2027E P/E of 13x. This is at a premium to TLKM's in view of the higher growth profile of ISAT. Improving ROICs should drive valuation multiple expansion, in our view.

Risks to Rating and Price Target

Key downside risks include:

- **Increased mobile competition:** While Indonesian telcos are currently looking to improve tariffs, the key risks to ISAT come from an escalation in competition. In our view, this could materialize in broad-based price competition or operators targeting ISAT customers in its profitable markets.
- **Aggressive investments in new growth segments, which could result in value destruction.**
- **5G rollout and spectrum costs:** While we expect capex for ISAT to remain elevated in the near to mid-term (at ~20% of sales), there could be upside risks if telecom operators pursue rapid and/or denser network rollouts. Moreover, as 5G lacks commercial applications, the 5G network investments could come with poor ROICs. Spectrum allocation has so far not been expensive in Indonesia. However, if there is aggressive bidding for 5G spectrum, it could result in downside risks to earnings and FCFs.
- **Higher interest rates:** Fifty percent of ISAT's debt is floating, which could result in higher interest expenses if there are increases in policy rates in Indonesia.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the

price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
